Vitis vinifera

Interlaken

Royalty Fee

‘Interlaken’ a self-pollinating, seedless grape. It is a woody, deciduous, climbing vine, typically growing 15 to 20′ long unless pruned. Large, shallow-cut, three-lobed, green foliage is tropical-like. Panicles of fragrant, greenish flowers appear in Spring, followed by clusters of white seedless grapes, in early-mid season (mid to late August in USDA Zone 5). Great tangy flavor, excellent for fresh eating.
Best fruiting in full sun, in well drained soil, but tolerates light shade & heavier soils. Good drainage is a must, and protection from harsh winds.
Relatively wildlife tolerant after establishment.
Very pollinator & wildlife friendly.

Common Name
'Interlaken' Green Seedless Grape

Variety
Interlaken

Zone
Zone 5

Mature Size
15'H x 10'W

Bloom Time
April-May

Plant Type
Fruits
