Gaylussacia brachycera

Berried Treasure

Gaylussacia is an ice age survivor! One colony in Pennsylvania covers over a mile…at 6 inches per year growth, that would make this single colony over 10,000 years old!
Box Huckleberry is related to Blueberries and is self-fertile. It produces a long (3/4″)drupe-like, blue fruit July to August.
Its leaves are glossy, minutely toothed, & lay almost flat along the stem. In Fall, they turn a brilliant red-burgundy.
Prefers full sun to partial shade, and well- drained humitic soil.
Wildlife & drought tolerant. Pollinator & wildlife friendly.

Common Name
'Berried Treasure'™ Box Huckleberry

Variety
Berried Treasure

Zone
Zone 5

Mature Size
12"H and spreading

Bloom Time
May - June

Plant Type
Groundcovers

Flower Color
White
