

Vaccinium

Razz

Like its siblings, Vaccinium Blueray and Bluecrop, Razz is the progeny of a cross between two USDA selections from early in the history of its blueberry breeding program.

Razz's robust, 4- to 6-foot plants reliably produce good yields of medium to large berries that ripen in midseason. The plump, powder-blue fruits, with unique raspberry overtones in their flavor, are excellent for fresh eating and culinary uses.

Common Name

'Razz' Northern Highbush Blueberry

Variety

Razz

Zone

Zone 4

Mature Size

4'H x 3'W

Bloom Time

April-May

Plant Type

Fruits

Flower Color

White
