

Rubus

Navajo

'Navaho' blackberry is an erect, thornless, Rubus cultivar. It is later-fruiting than most other erect thornless blackberries, and ripens firm, black berries in early Summer. They are more abundant but smaller than those of similar cultivars. Strong upright canes need no support.

Full sun, regular water, & good drainage for the best fruit.

Pollinator & wildlife friendly.

Common Name

'Navajo' Blackberry

Variety

Navajo

Zone

Zone 6

Mature Size

6'H x 6'W

Bloom Time

April-May
