Vitis labrusca

Canadice

Cornell University | Royalty Fee

'Canadice' is a self-pollinating, seedless American grape. It is a woody, deciduous, climbing vine, typically growing 15 to 20′ long unless pruned. Large, shallow-cut, three-lobed, green foliage is tropical-like. Panicles of fragrant, greenish flowers appear in Spring, followed by clusters of red, crisp, sweet & mild, seedless grapes, in early season (early August in USDA Zone 5). Good for jams, jellies and fresh eating. Best fruiting in full sun, in well drained soil, but tolerates light shade & heavier soils. Good drainage is a must, and protection from harsh winds. Relatively wildlife tolerant after establishment. Very pollinator & wildlife friendly.

Common Name
Red Seedless Grape

Variety
Canadice

Zone
Zone 5

Mature Size
20'H x 20'W

Bloom Time
May-June

Plant Type
Fruits

Flower Color
Greenish White
