

Thuja Occidentalis

# Danica

Danica' is a very hardy, slow-growing, dense, globe-shaped, evergreen conifer. Its emerald green foliage is very showy, being held in vertical sprays and turning blue-green in Winter.

Best grown in full sun, but appreciates relief from the warmest sun. Enjoys moist, well drained, neutral to alkaline soil.

Will not tolerate dry conditions. Heavy shade will result in loss of density.

*Common Name*

**'Danica' Arbovitae**

*Variety*

**Danica**

*Zone*

**Zone 3**

*Mature Size*

**2'H x 2'W**
