Vaccinium corymbosum

Sweetheart

USDA-ARS

‘Sweetheart’ is just that! Fabulously sweet flavored berries, often times twice in the same season! This Northern-Southern cross produces a heavy crop of medium to large, frosty berries in late May-early June, then, in milder climates, or with an extended Summer, a lighter fruiting in Autumn.
Best fruiting when interplanted with other Northern Highbush varieties such as ‘Earliblue’ or ‘Duke’.
Requires 750-800 chill hours to set fruit.
Full sun, in acid soil, with regular water and fertility.
Very wildlife and pollinator friendly.

Common Name
'Sweetheart' Northern Highbush Blueberry

Variety
Sweetheart

Zone
Zone 4

Mature Size
6'H x 6'W

Bloom Time
March - May

Plant Type
Fruits

Flower Color
White
