

Viburnum Plicatum

Summer Snowflake

Canadian Ornamental Plant Foundation

'Summer Snowflake' is an upright variety that can reach 8' tall. White lacecap-like flowers begin to bloom in Spring and continue sporadically through Summer, (hence the cultivar name) and frequently into early Fall. The stunning burgundy Autumn foliage color may all be simultaneously present. Leaves, flowers and fruits are smaller than those found on typical Viburnum. tomentosum plants. Originally discovered by R. F. Michaud of Alpenglou Gardens, Surrey, British Columbia, Canada, wild, in Japan in the the 60's . Introduced by the Canadian Ornamental Plant Foundation through the University of British Columbia plant introduction program.

Common Name

'Summer Snowflake' Japanese Snowball

Variety

Summer Snowflake

Zone

Zone 5

Mature Size

8'H x 6'W

Bloom Time

April-September

Plant Type

Evergreen Shrub
