

Vaccinium

Hardyblue

'Hardyblue' is a vigorous upright grower. Exceptionally sweet, medium size berry in mid-season, great for fresh eating and baking. Fall foliage is a brilliant yellow-orange and exposes dark red stems as it drops. Best when interplanted with other Northern Highbush varieties such as 'Bluecrop' or 'Blueray'. Prefers full sun with acid soil and regular water. Very pollinator and wildlife friendly.

Common Name

'Hardyblue' Northern Highbush Blueberry
