

Vitis vinifera

Interlaken

'Interlaken' a self-pollinating, seedless grape. It is a woody, deciduous, climbing vine, typically growing 15 to 20' long unless pruned. Large, shallow-cut, three-lobed, green foliage is tropical-like. Panicles of fragrant, greenish flowers appear in Spring, followed by clusters of white seedless grapes, in early-mid season (mid to late August in USDA Zone 5). Great tangy flavor, excellent for fresh eating.

Best fruiting in full sun, in well drained soil, but tolerates light shade & heavier soils. Good drainage is a must, and protection from harsh winds.

Relatively wildlife tolerant after establishment.

Very pollinator & wildlife friendly.

Common Name

'Interlaken' Green Seedless Grape

Variety

Interlaken

Zone

Zone 6

Mature Size

15'H x 10'W

Bloom Time

April-May

Plant Type

Fruits

Flower Color

Greenish
