

Vitis labrusca

Suffolk Red

Cornell University

Royalty Fee

'Suffolk Red' is a self-pollinating, seedless American grape hybrid. It is a woody, deciduous, climbing vine, typically growing 15 to 20' long unless pruned. Large, shallow-cut, three-lobed, green foliage is tropical-like. Panicles of fragrant, greenish flowers appear latter Spring – early Summer, followed by huge clusters of bright red, spicy-sweet flavored seedless grapes. Fruits appear late season. Considered one of the best dessert grapes. Best fruiting in full sun, in well drained soil, but tolerates light shade & heavier soils. Good drainage is a must, and protection from harsh winds. Relatively wildlife tolerant after establishment. Very pollinator & wildlife friendly.

Common Name

'Suffolk Red' Red Seedless Grape

Variety

Suffolk Red

Zone

Zone 5

Mature Size

20'h x 20'W

Bloom Time

May-June

Plant Type

Fruits

Flower Color

Greenish White
