

Taxus x Media

Densiformis

'Densiformis' is a female, semi-dwarf, dense and spreading cultivar, typically growing in a mound to 3-4' tall, and spreading to 5-7'. Lustrous, dark green, thin-needled foliage sets off the very showy cones – scarlet red berries. Taxus x media hybrid cultivars are crosses between Japanese yews (*Taxus cuspidata*) and English yews (*Taxus baccata*).

Very tolerant of most soil types & sun orientations, but will not tolerate standing water.

Relatively wildlife resistant once established.

Common Name

Yew

Variety

Densiformis

Zone

Zone 4

Mature Size

4'H x 6'W

Plant Type

Conifer
