

Ficus carica

Brown Turkey

'Brown Turkey' is a large fruited variety, best suited for fresh use. It has bronze skin, red flesh, and may be slightly hardier than most of the other varieties. May produce a large 2nd crop. Is somewhat dwarfing. The large leaves give this plant a tropical feel, and if left unpruned, can be a very bold statement. Prefers full sun & well drained soil, but will tolerate less of either. Pollinator friendly. Relatively wildlife resistant.

Common Name

'Brown Turkey' Fig

Variety

Brown Turkey

Zone

Zone 7

Mature Size

20'H x 20'W

Bloom Time

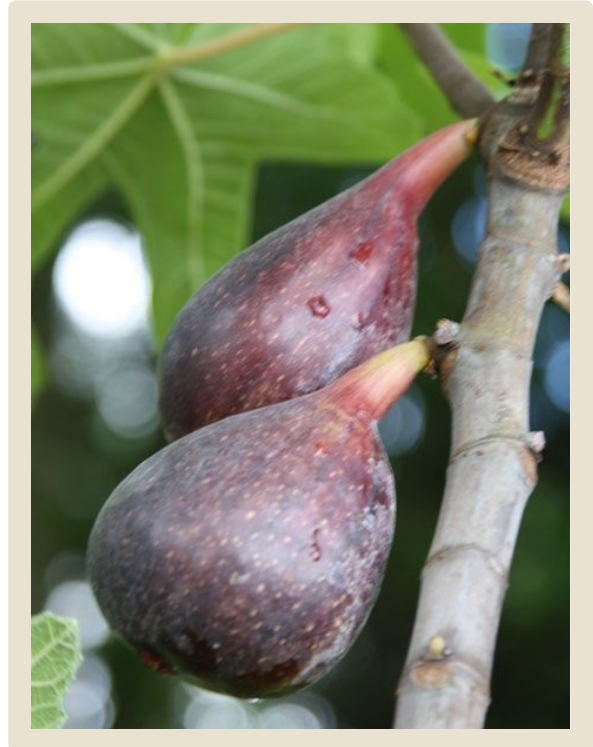

Spring

Plant Type

Fruits

Flower Color

Greenish
