Arctostaphylos x

# Pacific Mist

A low growing ground cover Manzanita with silvery green broadleaf evergreen foliage and small clusters of white bell shaped early spring blooms. Up to 2' in height with 6' spread, an excellent informal filler or attractive foot traffic deterrent. Prefers full sun, but tolerates more shade than most other Manzanitas. Requires very little water in the summer months, a great choice for xeriscaping, sloped landscapes, walls and containers. Prefers well drained, acid, un-amended soils of average fertility.

*Common Name*
***Manzanita***

*Variety*
***Pacific Mist***

*Zone*
***Zone 7***

*Mature Size*
***2' x 6'***

*Bloom Time*
***Early Spring***
