Hakonechloa macra

Albo-striata

The white-variegated hakone grass has been unjustly overshadowed by its gold-leaved kin. Its handsome striped foliage provides a bright accent in a shady garden. The effect is similar to that of ribbon grass (Phalaris), without the invasive tendency. Grows larger tha ‘Aureola’. 2’+ x 2’+

Common Name
'Albo-Striata' Japanese Forest Grass

Variety
Albo-striata

Zone
Zone 5

Mature Size
24-36"H
