Arctostaphylos uva-ursi x nummularia

Emerald Carpet

Carpet Manzanita is an excellent low growing, drought tolerant, groundcover. Requires occasional irrigation to look it's best. Brilliant green leaves on cinnamon-red stem adorn very thick, uniform plants, that hold their color well. White flowers yield red fruit.

It has been noted that Emerald Carpet is less inclined to suffer leaf spots and die back than other manzanita when planted in heavier soils and given regular irrigation.

Full sun to partial shade.

Attracts butterflies, bees, and birds.

Common Name
Emerald Carpet Bearberry

Variety
Emerald Carpet

Zone
Zone 8

Mature Size
1.5'H x 6'W

Bloom Time
Mid-winter through Spring

Plant Type
Groundcovers
