INTRODUCING VACCINIUM

Pink Popcorn[®]

Introduced by Briggs Nursery, this hardy northern high bush blueberry bears pink fruit that ripens early to mid-season. The medium sized, cream to pink berries have a darker pink blush, and offer true blueberry flavor and aroma. At a mature size of 5'H x 5'W, Pink Popcorn[®] can be planted in rows, or incorporated easily into the landscape, where its leaves offer red fall color. Pink Popcorn[®] is self-fertile, but will produce a larger crop of berries if planted in proximity to another early season variety. Like all blueberries, Pink Popcorn[®] prefers an acidic soil with adequate moisture.

- USDA Zones 3 to 7
- 5'H x 5'W at 10 years
- Vase-shaped habit
- Acidic soil; even moisture; full sun; approximately 800 chill hours
- Medium sized pink cream to pink berries with darker pink blush
- Early to mid-season producer
- Red fall color
- Self-pollinating
- Edible fruit production and/or ornamental landscape
