WISTERIA *Amethyst Falls* An American Beauty

An ideal choice for pergolas, trellises, fences, arbors, and containers, this gorgeous native vine can also be trained as a free standing tree. It blooms earlier than other types of wisteria, and is never a nuisance in the landscape, unlike its Asian cousins. Amethyst Falls blooms heavily in spring, and repeats through summer. Its fragrant, vividly blue flowers on 4 to 6-inch racemes, will attract early hummingbirds and butterflies to your garden all summer long.
