Quality that Grows™

- Yucca rigida 'Blue Sentry'
- Striking, very blue needles (foliage) on new growth, fade to powder blue, with a narrow, yellow margin
- Very upright, white flower spikes 1' to 2' above leaves
- Best uses – Xeriscapes; mass plantings; focal point in a landscape or large mixed container; SW 'native' landscapes
- Drought tolerant once established
- Deer resistant
- Very upright habit; 4' to 5'W x 10'H in the Southwest; 3' to 5' in cooler climates
- Prefers alkaline, but tolerates most soils
- Plant in full sun; well-drained soil that is on the dry side
- Low to average fertility
