

PERFUME Princess™

Daphne

The Sweet, Heady Fragrance
and Lovely Floral Display of
Daphne, *in an* Uncommonly
Vigorous, No-Fuss Shrub!

A recent arrival from Australia, Perfume Princess™ combines the unmistakable perfume and flowering performance daphnes are prized for, with a tough, durable habit, and uncharacteristic ease-of-growth. The first and last daphne to bloom every year, Perfume Princess™ produces masses of blush pink flowers from mid-winter to late spring. Its highly-fragrant blossoms, with citrus undertones, are four times larger than a traditional daphne, and flower along the entire length of the stem. Unlike other daphne cultivars, Perfume Princess™ is extremely vigorous, withstanding high temperatures, drought, and humidity. It is also disease resistant, and responds well to pruning. Makes an exceptional evergreen hedge, or showy choice for containers anywhere, for a seasonal punch of fragrance.

- Longest flowering period of all daphne; blooms from late winter to early spring
- Highly fragrant with citrus undertones
- Blush pink flowers are 4 times larger than other daphne cultivars
- Blooms entire length of the stem
- Dense, upright bush; 3ft x 3ft
- Attractive, deep evergreen foliage
- Withstands drought, humidity, high temperatures, waterlogging
- Hardy to USDA zone 7 to 9
