

Simply Enchanting!

This sensational evergreen from New Zealand is not like any other Magnolia. While undeniably lovely as a stand-alone specimen, its compact, bushy habit makes it especially ideal for planting en masse, to form an eye-popping hedge. From early to late spring, Fairy Magnolias® are blanketed with lightly perfumed flowers. And since the buds open at virtually every leaf axil, even trimming to hedge will not spoil the flowery display.

- Quick to grow and low maintenance
- Three distinct colors - blush, cream or white
- Masses of blooms!
- Pest and disease resistant
- Zones 7b to 11
