

Festuca

Festuca arundinacea 'GLOW STICKS'

'GLOW STICKS'

This brand new take on a tried and true favorite brings bold texture and color to the garden!

Tidy, 12 to 18-inch mounds of deep green grass create interest in the landscape. Pale yellow, wheat-like flower stalks, standing 24 to 30-inches tall, rise above the tuft in mid-spring, contrasting nicely against dark foliage.

'Glow Sticks' maintains its mounded, slightly spreading habit year-round. For best results, plant in full sun to partial shade. Once established, 'Glow Sticks' is water-saving, and resistant to drought, disease, heat and humidity. Winter hardy USDA Zone 3a-8b.
