

Cascade SUNRISE™

*Gaultheria
shallon*
'Gaulsid12'
USPPAF, CPBRAAF

**BRAND
NEW!**

***Our attractive new
Gaultheria shallon features
narrower, more tapered leaves,
and stunning red new growth!***

Native to Western North America, this hardy evergreen shrub tolerates a wide range of conditions - from part to full shade, in dry to moist soil. 'Cascade Sunrise' makes an ideal native groundcover, with the added bonus of beautiful, orange-red new growth, contrasting against the dark green foliage below. Abundant, drooping clusters of bell-shaped flowers appear in spring, followed by edible, blue-black berries. Its leaves are also narrower and more sharply tapered compared to other cultivars.

- Hardy to *USDA Zone 6*
- *Upright, evergreen shrub*
- *Mature height of 2 to 3 feet*
- *Vivid, orange-red new growth*
- *Foliage is narrower and more tapered*
- *Clusters of pale, urn-shaped flowers in spring*
- *Edible, blue-black berries in summer*
