

**Brand new dwarf  
Maiden Grass, featuring  
super-fine, silvery green  
foliage that dances  
in the wind!**

Super-fine, green new growth emerges in spring, then silvers with age. Fine red highlights appear around August, for an added touch of elegance. Abundant, silky white flower heads sway above the tidy clump from July to October, and remain attractive through the winter months, if left uncut.

'Gentle Breeze' maintains its neat, clumping habit year round, and adds lovely texture and movement to any garden. Great for container plantings, borders, modern courtyards and landscape plantings.
