

Anemone **Pink Cloud** PP#24,023

A veritable cloud of soft pink blossoms born on tall stems, dance in the wind above a compact mound of fresh green foliage.

Anemone x hybrida 'PKAN' Pink Cloud, PP#24,023

This stellar selection presents a lovely sight in the garden. Large, single pink blossoms are born on tall stems that sway in the wind, attracting bees and other pollinators. A prolific bloomer, Pink Cloud will flower continuously from summer to fall. It's much more compact than a typical Japanese Anemone, so it can be planted front and center of a mixed perennial bed, instead of being relegated to the back with the taller plants. Pink Cloud will grow to a height of 15 to 20 inches, and width of 8 to 12 inches. It prefers a spot in the semi shade, in soil that is moist but well-drained, and rich in organic matter.

- USDA zone 5
- Prolific large flowers
- Long flowering season
- More compact than other cultivars
- 15-20"H x 8-12"W
- Low maintenance
- Attracts pollinators
