

FARGESIA

Rufa

ORNAMENTAL CLUMPING BAMBOO

The beautiful, orange-red cane sheaths at each node add warmth and color to this appealing, well-contained bamboo. Rufa is exceptionally cold hardy, sun and wind tolerant, and grows equally well in sun or shade, making it one of the most popular and versatile clumping bamboos available. Its deep green, traditional bamboo leaves will not curl in sunlight or freezing temperatures. Rufa is non-spreading and non-invasive, with a very dense, slightly weeping habit, rapidly growing to a mature height of up to 8-feet. A perfect specimen for smaller gardens or containers, and works equally well as a small screen or hedge.

- ▶ *USDA Zones 5 to 9*
