

PULMONARIA

Lisa Marie

PP#31,226

Selected for its uniquely colored flowers, extra-long lance-shaped foliage, and silvery leaf markings, this lovely lungwort makes a spectacular shade garden display. In late spring, 'Lisa Marie' is covered with loads of large, raspberry-pink blossoms arranged along sturdy stalks. After an extended bloom time, 10 to 12-inch dark green leaves dotted with silvery markings, are a show stopper for the rest of the season. Trialed for over ten years by Hoffie Nursery, 'Lisa Marie' has been proven to be hardy and consistent in color and habit. For stunning seasonal color from spring to late fall, plant this beauty in part to full shade, in average garden soil that is moist but well-drained.

Pulmonaria 'Lisa Marie' PP#31,226
